

Project Title:

Data exploration in Product Catlog and Inventory Summary

Project Objective:

A product table holds product_id, product_name, Brand_name, Price, Quantity and Category. It perfoms below function to improve data quality and presentation

- 1) Handling missing values
- 2) Correcting inconsistent data
- 3) Removing duplicates
- 4) Splitting and merging data
- 5) Number formatting
- 6) Conditional formatting

Dataset Description:

A product table holds below listed columns dataset.

1)Product_id, 2) Product_name, 3) Brand_name, 4) Price, 5) Quantity 6) Category.

Column Description

Column Name	Description
Product ID	Represent the unique product identifier along with country code and timestamp details. Example: 28-JAN-US, 15-FEB-US
Manufacturing_date	Split the "Product ID" column into " Manufacturing Date" Remove unnecessary characters, if any.
Country_code	Split the "Product ID" column "Country Code". Remove unnecessary characters, if any.
Product_brand	Merge the "Brand Name" and "Product Name" columns into one column named "Product Brand".
Product Name	Represents the name of the product. Example: Laptop, T-shirt, Headphones

Brand Name	Represents the brand associated with the product. Example: Dell, Nike, Adidas
Price (\$)	Represents the price details of respective product.
Quantity	Represent the quantity of products purchased by the customer.
Category	Represent the grouping of products based on category type.

Data cleaning & transformation: 3 full row duplicate record were identified and cleaned the data in product table.

Duplicate product_id: 16-APR-ES, 17-JUN-IN, 21-AUG-CA

3 Duplicate Products found and removed in product table.					
Product ID	Product Name	Brand Name	Price (\$)	Quantity	Category
16-APR-ES	headphones	Bose	250	20	Electroni
16-APR-ES	headphones	Bose	250	20	Electroni
17-JUN-IN	Laptop	HP	950	25	Electronics
17-JUN-IN	Laptop	HP	950	25	Electronics
21-AUG-CA	Laptop Bag	Samsonite	50	35	Accessories
21-AUG-CA	Laptop Bag	Samsonite	50	35	Accessories
